

RAPID TAGGER™

Simple & Reliable

U.S. PATENT NO. 6 442,914

THE U.S.A.

The *RAPID TAGGER* has earned a reputation in the greenhouse industry as a simple, consistent performer. Save labor by automating the tedious task of tagging flats & pots.

It's flexible; accommodating tagging from the front or side of the tray, as well as unlimited tray configurations. Ideal for all sizes of greenhouse operations, the *RAPID TAGGER* is another reliable machine designed with you in mind.

In most tray configurations, it is capable of tagging over 700 trays per hour using compressed air and vacuum. Accurate placement of tags is achieved automatically. Trays and pots in shuttle packs pass under each tagging head. This is done using a timer to regulate the spacing of tags.

The number of rows and cells to be tagged is set by the grower. Changing tray configurations is easily done with small adjustments. The tags are positively held in easy access, open style aluminum chute, making tag changes a breeze!

SPECS:

- ⇒ Speed: Up to 750 trays per hour
- ⇒ 110VAC 1.6A Electrical Supply
- ⇒ 5.5 CFM @ 90PSI Air Supply
- ⇒ Length: 48" Width: 31" Height: 69"
- ⇒ Conveyor Height 31"-37"
- ⇒ Weight approx 175lbs.

OPTIONS:

- ⇒ Additional/Custom Tagging Heads
- ⇒ Custom Chute
- ⇒ Electronic Counter
- ⇒ Left hand controls
